

## Bolton Hop River State Park Trail

### Trail Highlights

This trail is a part of the Hop River State Park Trail that begins in Bolton and ends in Columbia/Windham; it is also a part of the planned East Coast Greenway. This 3.5-mile section begins at the Vernon town line where it will connect with Vernon's Rail to Trail Park. The trail travels southeast to Bolton Notch then passes under Route 6, and crosses Notch Road and Steel Crossing Road. This section of trail proceeds in the same direction to the Coventry town line. At this point the trail will pick up the Coventry portion of the trail. This section of trail is unimproved.

**There are remains of railroad bridges along this trail. Extreme caution must be taken in these areas.**

### Parking and Accessibility

No designated parking is available for trail users.

**From Route 44 West:** Turn right onto a dirt road located approximately one-half mile after the traffic signal at the intersection with Quarry Road. The dirt road allows access to the parking area.
